# Advania API

Setup and instructions

# Advania API

## 1. Setup

Advania API Setup can be accessed from the search:

Te	II me what you want to do		ZX					
A	dv api set							
G	io to Pages and Tasks							
>	Advania API Setup Administration							
Adva	nia API Setup page will open:							
$\leftarrow$		+ ₪ ✓Saved						
	Advania API Setup							
	Actions $\vee$ Automate $\vee$							
	-	Enabled · · · · · · · · · · ·						
	General							
	Guest Customer		$\checkmark$					
	Connection Settings							
	Tenant Id · · · · · · · ·	Company Id	1-a201-604					
	Environment	Help Page						
	Company Name							

In General tab we can find fields:

- **Guest Customer**: Customer used for sales orders if the customer is empty from web store and customer used to calculate price and discount

In Connection Settings tab we can find fields that need to be used to create the API URL for the third party that is connecting to BC.

#### Items

On the Item card under the tab Advania API we have two new fields "Show in webstore" and "Special order item"

Advania API	
Show in webstore	Special order item · · · · · · · · · · · · · · · · · · ·

Both fields are returned in the endpoint for items. They don't have any functionality in BC and are only used on the web store side.

### **2.** INSTRUCTIONS

When a webstore/integrator is successfully connected to BC via Advania API, all sales will be listed in the Sales Orders page.
